Portfolio: aarcero.github.io

EDUCATION

University of Maryland

Bachelor of Science, Information Science. GPA: 3.57/4.00.

Prince George's Community College

Associate of Science, Business Administration. High Honors. GPA: 3.80/4.00.

College Park, MD

Expected: May 2027

Upper Marlboro, MD

December 2024

EXPERIENCE

Data Analytics Trainee

June 2026 – August 2026

Global Career Accelerator

Remote

- Completed two industry capstone projects analyzing real-world datasets for the Grammy Recording Academy and Intel, delivering findings through interactive dashboards and data-driven presentations.
- Performed data cleaning, dashboard development, and statistical analysis across 10+ real-world business datasets using Excel and Tableau.
- Delivered actionable recommendations through interactive dashboards and structured presentations simulating stakeholder communication with industry clients.

Shift Lead

November 2022 – August 2023

Best Buy

College Park, MD

- Mentored sales associates on consultative selling techniques, increasing accessory attachment rates by 30-40% and contributing approximately \$80,000 in additional monthly sales.
- Maintained the store's #1 district sales ranking by supporting daily operations, coaching team members, and ensuring exceptional customer experiences.

PROJECTS

Grammy Website Performance Analysis (Capstone)

Excel

- Analyzed real website performance data following the 2022 separation of Grammy.com and RecordingAcademy.com, evaluating engagement KPIs and mobile visitor behavior to assess the business impact of the split.
- Applied advanced Excel analytics including PivotTables, XLOOKUP, SUMIFS, AVERAGEIFS, and conditional logic to develop data-driven business recommendations presented to industry clients.

Intel Data Center Sustainability Analysis (Capstone)

Tableau

- Analyzed real regional energy production, demand, and renewable energy trends to recommend a sustainable location for a proposed Intel data center based on energy availability and sustainability.
- Built an interactive Tableau dashboard using calculated fields, parameters, filters, and multiple visualization types to compare energy surplus, generation and demand trends, and renewable energy availability across regions.

Automatic Course Scheduler https://github.com/aarcero/INST326_Final_Project

Python, REST API, JSON, Regular Expressions

- Developed a Python command-line application that automatically evaluated hundreds of potential course combinations to generate conflict-free semester schedules using the University of Maryland Testudo API.
- Piloted the application with 5 students, validating prerequisite checking, time-conflict detection, and advisor recommendation features using object-oriented programming, regular expressions, and JSON processing.
- Improved scheduling efficiency by automatically prioritizing required coursework while minimizing manual planning.
